 njerumarshall@gmail.com

 Kasarani, Nairobi

PROFILE

I am an enthusiastic mechatronic engineering student skilled in CAD software and Java programming. Collaborative team player with effective communication skills. Eager to apply theoretical knowledge to innovative 3D projects.

SKILLS

- Problem solving skills honed from project design and debugging
- Knowledge of 3d modelling software such as Solid Works
- Good communication skills acquired from working in joint project and assignments
- Creative
- Adaptable Engineer with a demonstrated ability to quickly learn and apply new technologies

HOBBIES AND INTERESTS

- Running
- Reading Novels
- Passionate about staying informed on scientific and historical advancements.

EDUCATION

The University Of Cape Town

2023 - present

B.A of Mechatronics Engineering

Moi High School Kabarak

2018 - 2023

Kenya Certificate of Secondary Education

PROJECTS

- Made a tank water level sensor during the first year of university education
- Modelled a car axle mechanism on solid works software
- Has worked on multiple mini-coding project such as a model of a parking toll system
- Worked on a maze solving algorithm and programmed a micromouse to execute it.
- Designed a ice-buoy frame for sea-ice and open water wave measurement.
- On going projects include investigating the combined use of Motor Current Signature Analysis and Magnetic Flux Analysis to identify induction motor faults.

WORK EXPERIENCE/INDUSTRIAL ATTACHMENT

Communication Authority of Kenya

2 December 2024 - 31 January 2025

Conducted at the Frequency Spectrum Management Department. Acquired skills on signal processing and hardware maintenance.

Jomo Kenyatta International Airport

15 December 2025 - 6 February 2026

Conducted at the Electro-Mechanical Department. Acquired skills on the maintenance of motors, escalators, conveyor belts and air conditioning units.
